CUSTOMER GUIDE

The complete guide to your Surplife app.

Colors, scenes, timers and more for your permanent roofline lighting.

WELCOME

Thank you for choosing Peak.

Your permanent roofline lights are installed and ready. With the Surplife app, you can change colors, choose scenes and set schedules from your phone, any evening of the year.

This guide walks you through each step. If anything is unclear, we are only a call away.

03	Connect your lights	5
04	Change your colors	6
05	Scenes	7
06	Timers & music	8
07	Troubleshooting	9
08	Warranty & service	13
09	Service area	14

SECTION 01

Your system at a glance.

01 **Connect**
Pair the app with your controller over Bluetooth.

02 **Color**
Pick any color for your whole roofline or just a section.

03 **Scenes**
Ready-made looks for everyday, holidays and moods.

04 **Timers**
Set your lights to turn on and off automatically.

05 **Music**
Let your lights move with the beat.

> Allow about five minutes for first-time setup. After that, changing your lights takes seconds.

SECTION 02

Download & register.

1 **Download Surplife**

Search for “Surplife” in the App Store (iPhone) or Google Play (Android), then tap Install.

2 **Create your account**

Open the app and register or log in. You can also look around as a guest first if you prefer.

Tip. Use an email you check often. You will need it if you ever switch phones.

Need a hand? Call or text **385-292-1212**

SECTION 03

Connect your lights.

1 **Power on your lights**

Make sure your controller is plugged in and the lights are on.

2 **Turn on Bluetooth**

Enable Bluetooth in your phone's settings and stay within a few feet of the controller.

3 **Add your device**

Open Surplife and tap "Add device" or the "+" button. Your controller will appear to connect.

4 **Name it and pick a room**

Give your lights a name like "Front Roofline" and choose a room for them.

Need a hand? Call or text **385-292-1212**

SECTION 04

Change your colors.

Illustration. Your screen may look slightly different.

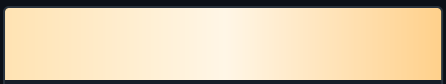

1 **Open Color**
Choose the whole strip for one color, or segment mode to color sections differently.

2 **Smear or erase**
In segment mode, paint colors onto parts of your lights or erase them, and add a gradient.

3 **Set brightness**
Slide brightness up or down to suit the evening.

SECTION 05

Scenes.

Life

Everyday looks for your home.

Landscape

Nature-inspired color blends.

Festival

Bright looks for holidays and events.

Mood

Soft, relaxed lighting.

Make it yours with DIY

Tap DIY to build your own scene with custom colors and effects, then save it.

Save your favorites

Tap Favorite on any scene to find it again in one tap.

SECTION 06

Timers & music.

Timer

Choose the times your lights turn on and off, and which scene or color they use.

Sequence

Combine several lighting effects and set how long each one plays, one after another.

Music rhythm

Make your lights react to music from your phone or a built-in microphone.

Tip. Some features depend on your controller model. If you do not see one, ask us.

Need a hand? Call or text **385-292-1212**

SECTION 07

Troubleshooting.

Start with these four checks. They fix most problems.

1 **Check the power**

Make sure the controller is plugged in and your lights are switched on.

2 **Turn on Bluetooth**

Switch Bluetooth on in your phone's settings. The app reaches your lights over Bluetooth.

3 **Stand close**

Move to within a few feet of the controller, then try again.

4 **Reopen the app**

Close Surplife completely, open it again and give it a moment to find your lights.

Still not right? Find your problem on the next pages, or open the same guide on your phone at **peaklightingutah.com/setupguide**

SECTION 07 · TROUBLESHOOTING

The app can't find my lights

1. Check that the controller is plugged in and the lights are on.
2. Turn on Bluetooth in your phone's settings. If your phone asks whether Surplife may use Bluetooth, choose Allow.
3. Stand within a few feet of the controller.
4. Unplug the controller, plug it back in, and keep your phone close while it starts up.
5. Close Surplife completely, reopen it and tap **Add device** again.

Still not showing? Call or text us and we will get you connected.

My lights don't respond

1. Confirm the controller has power and the lights are on.
2. Check that Bluetooth is on. Your lights should show **Local Online** in Surplife. **Local offline** means your phone's Bluetooth is not connected to them.
3. Move closer to the controller and try again.
4. Unplug the controller and plug it back in. Wait about a minute, then pull down on the Surplife home screen to refresh.

If they still don't respond, call or text us.

Still stuck? Call or text **385-292-1212**

SECTION 07 · TROUBLESHOOTING

Only part of my roofline lights up

1. In Surplife, open **Settings** for your lights and find the number of lights.
2. Make sure that number matches your system. Call or text us and we will tell you the right number for your home.

If a section stays dark or shows the wrong color after that, it needs a look from us.

My timer didn't run

1. Open **Timer** in Surplife and check the on and off times, and which color or scene it uses.
2. Make sure the controller still has power. A timer can't switch on a controller that is unplugged.

If the times are right and it still doesn't run, call or text us. Some timer features depend on your controller model.

I can't control my lights away from home

That is expected. Your lights connect to your phone over Bluetooth, so the app controls them while you are home and within range. According to Surplife, control from anywhere and voice assistants need a controller that is connected to the internet.

Want that? Ask us what your controller supports.

Still stuck? Call or text **385-292-1212**

SECTION 07 · TROUBLESHOOTING

My lights don't move with the music

1. Make sure your lights show **Local Online** in Surplife. Music needs your phone connected to the lights.
2. Tap your lights, then open **Music Mode**, the third icon along the bottom.
3. Tap **+** to add music, then press play and watch whether the lights follow the beat.

Some controllers can also listen through a built-in microphone. That depends on your controller model, so ask us if you don't see it.

My app doesn't match this guide

Surplife updates its app from time to time, so your screens may look slightly different from the names used here. Some features also depend on your controller model.

If you can't find something, ask us and we will point you to it.

I got a new phone

1. Download Surplife on the new phone.
2. Log in with the same email you registered with.
3. Turn on Bluetooth and stand near the controller.

If your lights don't appear after you log in, call or text us.

Still stuck? Call or text **385-292-1212**

SECTION 08

Warranty & service.

5 years

Service warranty

From Peak. Coverage begins after final payment.

10 years

Parts warranty

Through the manufacturer or supplier.

Lifetime

Bulb coverage

From Peak.

Coverage is subject to your project agreement and manufacturer terms.
